PROFILE

Software Engineering undergraduate interested in full-stack development, AI-powered applications, system design, and software engineering. Experienced in developing web, mobile, and security-focused applications through academic and practical projects. Seeking opportunities to apply technical skills and contribute to impactful software products.

EDUCATION

BSc in Software Engineering Institute of Information Technology Noakhali Science and Technology University CGPA: 3.47 (Up to 5th Semester)	Expected: June 2027
Higher Secondary Certificate (HSC) Bakalia Government College, Chattogram	2019 – 2021 GPA: 5.00
Secondary School Certificate (SSC) Kornophully High School and College, Rangamati	2017 – 2019 GPA: 5.00

SKILLS

- **Languages:** C, C++, Java, Python, JavaScript, PHP
- **Frontend:** HTML, CSS, Tailwind CSS, React,
- **Backend:** Laravel, Node.js, Express.js, FastAPI, REST APIs,
- **Mobile:** Flutter
- **AI & Machine Learning:** TensorFlow, Keras, NumPy, Pandas, Scikit-learn
- **Generative AI:** LangChain, GPT-4o mini, Gemini Flash 2.0, Llama Vision, Gemma 3
- **APIs & Automation:** Groq API, Agora API, n8n
- **Database:** MySQL
- **Tools:** Git, GitHub, VS Code, Android Studio, Vite

PROBLEM SOLVING

Total Solve Count: 300+ **Codeforces:** 20 (ongoing) **LeetCode:** 150 (ongoing) **CSES:** 30+
Miscellaneous: 100+ (Beecrowd, CodeChef, HackerRank)

PROJECTS

Langal – AI-Powered Agricultural Platform 2025

Flutter, React, Laravel, Python, TensorFlow, Keras, FastAPI, LangChain, n8n, GPT-4o mini, Gemini Flash 2.0, Llama Vision, Gemma 3, Groq API, Agora API

[View on GitHub](#)

- Developed a dual-solution platform consisting of a farmer mobile application and government web portal for crop recommendation, disease detection, market pricing, weather alerts, and expert consultation.
- Built an AI-powered crop disease detection and recommendation system that analyzes crop images, identifies diseases, and provides treatment suggestions to farmers.

- Integrated AI assistance, automated agricultural workflows, real-time expert consultation, and intelligent services to support farmers and government agricultural management.

UPAMA – NGO Management System

2026

Laravel, PHP, MySQL, Blade, REST APIs, MVC Architecture

Live Website

- Developed a full-stack NGO management system with separate user portal and admin panel.
- Implemented structured workflow management for NGO operations including member tracking and activity handling.
- Designed centralized data management, reporting, and administrative oversight.

SecureCloud – Secure Cloud Storage Simulator

2024

Java, Java Swing, AES-GCM, RSA Cryptography, OTP Authentication

View on GitHub

- Built a secure cloud storage system with encrypted file handling and secure data access.
- Implemented authentication and verification mechanisms for user security and data integrity.
- Developed audit logging and access control features for monitoring system activities.

Bhool Bhulaiyaa – Maze Solving Game

2024

Java, Java Swing, Binary Tree Data Structure

View on GitHub

- Developed a dynamic maze-solving game with procedurally generated levels.
- Implemented multiple gameplay modes with interactive user experience.
- Designed scoring and timer-based challenge system to enhance engagement.

Interactive Periodic Table – Educational Application

2023

Java, Java Swing

View on GitHub

- Developed an interactive educational tool for exploring periodic table elements.
- Implemented categorized element information display with interactive navigation.
- Designed a user-friendly interface to improve the learning experience.

ACHIEVEMENTS

NSTURS Research Proposal Contest 2.0, 2026

Secured 1st place in a university-level research competition.

National AI Build-A-Thon 2026

Ranked among top 20 teams nationally in an AI competition.
